Authorization for this examiner's amendment was given via telephone by Attorney Steven Lawrenz, Reg. No. 37376, on 3/30/2006.

The application has been amended as follows:

In the specification:

On page 1, line 6, after "filed December 7, 1999," please insert --now United States Patent No. 6,618,755,--.

Allowable Subject Matter

5. The following is an examiner's statement of reasons for allowance:

Independent claims 5, 10, and 25 distinguish themselves over the prior art of record by delineating a method, computer-readable medium, and data processing system for identifying

Art Unit: 2152

subnet address ranges for subnets being used in a network by a series of steps that include accessing a binary tree and traversing the binary tree to identify candidate nodes. More specifically, the claims show a patentable distinction over the prior art for the way in which it is determined whether the address range is a subnet address range for a subnet being used in the network through the use of the binary tree and its series of nodes. Furthermore, the prior art gives no indication that it would have been obvious to one of ordinary skill in the art at the time of the applicant's invention to identify subnet address ranges in the fashion presented in the claims.

Claims 6-9, 11, 12, 23, 24, 26, and 27 are allowed due to their dependence on claims 5, 10, and 25.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
